

# POLYTRON™ TECHNOLOGY

## Advanced & Superior Lubrication & Protection

★  
Polytron products are the most advanced lubricant in the world. It is a scientific breakthrough in lubrication technology that works on micro-metallurgical process.

★  
POLYTRON is high tech lubricants technology brand manufactured in California, U.S.A, developed by American Scientists. Polytron products are researched products and have major international approvals.

★  
Polytron products are the unique Petroleum based technology with no coating chemicals viz Ceramic, PTFE, Molybdenum etc.

### Approvals:

Environmental Protection Agency (USA)

DETROIT DIESEL

VOLVO

World's 1st Petroleum  
Based Oil Additive

## POLYTRON™ METAL TREATMENT CONCENTRATE (MTC)

- Compatible with all types & grade of engine oil.
- Decrease wear of Engine/Equipment up to 95%.
- Extends service life of engine to overhaul by 2-5 times\*\*. 
- Immediate reduction in noise, vibration & temperature. 
- Maximizes engine's power, torque & fuel efficiency. 
- Considerable reduction in emission of pollutants. 
- Reduce oil top-up volume.
- Keeps engine totally clean of any deposit build-up.
- Experience smooth drive with great pick-up & mileage. 

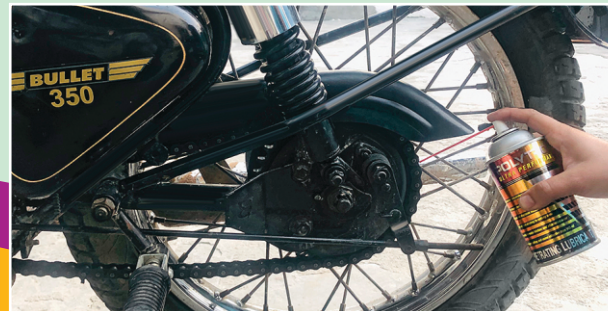

## POLYTRON™ PENETRATING LUBRICANT

- Works as lubricator, removal & protector where rust & corrosion is the factor
- Extends life of Chain Sprockets by up to 3-4 times by eliminating wear by 90-95%
- Reduces temperature & noise due to friction
- Provides smoother operation of moving metal mechanism
- Protects parts in harsh environment of dust, moisture & extreme temperature
- Keeps parts clean from any deposit build-up
- 20 times longer-lasting and more effective than WD-40

★  
Works as  
Lubricator

Life of Chain

Technology beyond lubrication

## POLYTRON™ FUEL CONDITIONER

- Compatible with both Diesel & Petrol.
- Improves vehicle mileage by up to 20%. 
- Reduce emission of pollutant up to 60-80%.
- Cleans & Lubricates Entire fuel system line such as Injectors, Valve, Ports, Valve Seats, Upper Piston Rings, Piston Top.
- Maximize power & compression.
- Provides Prompt engine start-up in cold weather. 
- Neutralize poor quality fuel.
- 95% chances to pass the smoke test, if failed once.
