

POLYTRON™ TECHNOLOGY

Advanced & Superior Lubrication & Protection

★
Polytron products are the most advanced lubricant in the world. It is a scientific breakthrough in lubrication technology that works on micro-metallurgical process.

★
POLYTRON is high-tech lubricants technology, manufactured in California, U.S.A, Developed by American Scientists. Polytron products are researched products and have major international approvals.

★
Polytron products are the unique Petroleum based technology with no coating chemicals viz Ceramic, PTFE, Molybdenum etc.

Approvals:

Environmental Protection Agency (USA)

DETROIT DIESEL

VOLVO

World's 1st Petroleum
Based Oil Additive

POLYTRON™ Polytron Metal Treatment Concentrate (MTC) Oil Additive

- Compatible with all types & Grade of Engine oils
- Decrease wear of Engine/Equipment up to 95%
- Extends Engine Service life to overhaul by 2-3 times** 
- Immediate reduction in noise, vibration & temperature 
- Maximizes engine's power, torque & fuel efficiency 
- Considerable reduction in emission of pollutants
- Reduces oil top-up volume
- Keeps engine totally clean of any deposit build-up
- Experience smooth drive with great pick-up & mileage 

USE POLYTRON™ TO GET RID OF

Technology beyond lubrication

POLYTRON™ Polytron Fuel Conditioner (Fuel Additive)

- Compatible with both Diesel & Petrol
- Improves vehicle mileage up to 20% 
- Reduces emission of pollutant up to 60-80%
- Cleans & Lubricates Entire fuel system line such as Injectors, Valve, Ports, Valve Seats, Upper Piston Rings, Piston Top
- Maximize power & compression
- Provides Prompt engine start-up in cold weather 
- Neutralize poor quality fuel
- 95% chances to pass the smoke test, if failed once
